## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 6-10 and 16-17 are rejected under 35 U.S.C. 102(a) as being anticipated by Bolte et al for the same reasons as urged in the action of 3-31-03.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolte for the same reasons as urged above and the reasons presented in the Response to Arguments in the action of 3-31-03.

### ***Response to Arguments***

Applicant's arguments filed –5-03 have been fully considered but they are not persuasive. Applicants argue in the 4<sup>th</sup> and 5<sup>th</sup> paragraphs on page 2 of their response that "an inert atmosphere to cure the composition" and thus requires an extra step in the curing method". The examiner is not convinced by this argument since applicants'

Art Unit: 1762

claims for example claim 6 does not exclude the extra step of the reference and applicants even agree that the step could be included in the claim. It is also noted that the curing in the reference is solely by radiation since the argon does not cure the coating since it is inert.

In further response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

New use of the same art, different reasons why claims are not patentable over the same art or new points of argument raised are not new grounds of rejection. See *Ex parte Lindner* 105 PQ 245.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
